finish
every time.

PercoTop® 9700

The perfect
durable finish
every time.

At Axalta Coating Systems we know the commercial vehicle market demands exceptional topcoat hold-out. Nothing less will do. That's why we developed PercoTop® 9700 - it guarantees a perfect and highly durable finish every time. It's a VOC-compliant, high-solids polyurethane topcoat specifically developed for OEM commercial vehicle, trailer, bus and mini-bus manufacturers. In fact, PercoTop® 9700 is the right choice for any commercial vehicle that needs a first-class finish.

PercoTop® 9700, a two-component solventborne topcoat, achieves its stunning final appearance in one or 1.5 passes thanks to its optimised flow. A wide variety of activators and thinners suited to various equipment and climatic conditions ensure optimum results every time.

For convenience, PercoTop® 9700 is available either as a factory package or a complete product line consisting of concentrated mixing tints and a specialist binder. The tints and binder concept allows the mixing of any topcoat colour on demand. And existing colours can quickly be reproduced with complete accuracy. PercoTop® 9700 can also deliver a wide range of gloss levels, from matt to high gloss, with ease. Simply replace the high-gloss binder CS970 with the flat binder CS979 to get the required gloss level.

PercoTop® boosts paintshops' productivity too. It offers good flow, reduced application time, very short drying times and lower material consumption. With our end-users in mind, we have formulated PercoTop® 9700 to suit conventional, HVLP and high-pressure spray equipment.

PercoTop® 9700 guarantees excellent results on every level - a perfect finish with increased productivity and emission-standards compliance.

Highlights

- 2K high solid polyurethane quality
- VOC less than 420 g/l
- Good flow
- High-gloss finish
- Excellent appearance
- Various gloss levels available
- Easy to apply
- Reduced application time
- Lower material consumption
- Fast drying
- Decreased energy cost in application and drying
- Wide colour availability
- Excellent mechanical properties
- Robust chemical and weather resistance
